JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS
Volume 76, Number 1–2, 17 December 1996

Contents

L. Gemignani
A fast iterative method for determining the stability of a polynomial 1

A. Messaoudi
Recursive interpolation algorithm: a formalism for solving systems of linear equations—I. Direct methods 13

A. Messaoudi
Recursive interpolation algorithm: A formalism for solving systems of linear equations—II Iterative methods 31

R. Bertschy and P.A. Monney
A generalization of the algorithm of Heidtmann to non-monotone formulas 55

S. Bellavia, M.G. Gasparo and M. Macconi
Partially Updated Switching-Method for systems of nonlinear equations 77

M. Mitrouli, N. Karcanias and C. Koukouvinos
Numerical performance of the matrix pencil algorithm computing the greatest common divisor of polynomials and comparison with other matrix-based methodologies 89

S. Tracogna
Implementation of two-step Runge–Kutta methods for ordinary differential equations 113

Z.-Z. Sun
A second-order accurate finite difference scheme for a class of nonlocal parabolic equations with natural boundary conditions 137

G.N. Elnagar and M. Kazemi
Chebyshev spectral solution of nonlinear Volterra–Hammerstein integral equations 147

F. Casas
Solution of linear partial differential equations by Lie algebraic methods 159

T. Schira
The remainder term for analytic functions of Gauss–Lobatto quadratures 171

M. Calvo, J.M. Franco, J.I. Montijano and L. Rández
Explicit Runge–Kutta methods for initial value problems with oscillating solutions 195

S. Lewanowicz
Recurrence relations for the connection coefficients of orthogonal polynomials of a discrete variable 213

C. Dagnino and P. Lamberti
Numerical evaluation of Cauchy principal value integrals based on local spline approximation operators 231

A. Chakrabarti and Hamsapriye
Modified quadrature rules based on a generalised mixed interpolation formula 239

A.B. Olde Daalhuis
Hyperterminants I 255

M. Zähle and H. Ziezold
Fractional derivatives of Weierstrass-type functions 265

P.W. Hemker
A singularly perturbed model problem for numerical computation 277

E. Venturino
On the (0, 4) lacunary interpolation problem and some related questions 287

D. Kim, J. Kim and D.Sheen
Absorbing boundary conditions for wave propagation in viscoelastic media 301

K. Pan
On the convergence of rational functions orthogonal on the unit circle 315

J. Zhang
A cost-effective multigrid projection operator 325

Author Index 335
